# FOREVER MEANS FOREVER

At Buck, we guarantee our knives forever because we believe in the integrity of our products.

It was the philosophy of our founder, Hoyt Buck, who pioneered our Forever Warranty and we continue to pass it down with each generation. Complete warranty information is on our website at buckknives.com.

# **BUCK KNIVES**

In 1902, when Hoyt Buck was looking for a better way to temper steel and created the first Buck knife, he didn't realize he was paving the way for his family to become the most famous name in knives. Today, an industry leader in edge retention and famous for exceptional quality, Buck Knives creates each knife by strictly following these practices.

# STEEL SELECTION

Steel is more than a number. Each steel used by Buck has unique properties which we match to the intended use of the product.

CPM S45VN is a new, martensitic stainless steel designed to offer improved corrosion and wear resistance over other leading steels. The CPM (Crucible Particle Metallurgy) process produces a very uniform, high quality steel defined by supreme stability, grindability and toughness compared to those produced by other melting practices. The chemical components in S45VN utilize niobium and nitrogen in place of some of the vanadium and carbon to provide an excellent combination of edge retention, wear resistance, corrosion resistance and toughness. These properties make it a solid choice for blades intended for heavy use, such as an everyday carry or work knife.

### Rc 59-61

CPM S35VN is a martensitic stainless steel created to provide improved toughness over CPM S30V. The chemical makeup is balanced to form some niobium carbides along with vanadium and chromium carbides, making CPM S35VN about 15-20% tougher than CPM S30V without any loss of wear resistance. This increased toughness helps prevent edge chipping, as both vanadium and niobium carbides are harder and more effective in providing wear resistance. As with both S35VN and S45VN steel, the CPM process produces a uniform, high quality steel characterized by superior stability, grindability and toughness compared to steels produced by other melting practices. A premier hunting steel, it would be appropriate for the big game hunter or guide who intends to field dress multiple animals.

### Rc 59-61

Small grain structure with a high carbon content has allowed this powdered steel to become the industry standard by which other super steels are compared. With our BOS heat treat process, the Rc 59-61 steel outperforms other steels in edge retention, ductility, and wear resistance. This steel takes a beating and holds an edge for a long time. The properties that allow it to hold an edge also slow the sharpening process. S30V is perfect for somebody seeking a high performance blade, but does not want to have to sharpen in the field.

### Rc 59-61

This martensitic stainless steel with its hardness at a Rc of 58-60 results in a good balance between edge retention, amazing corrosion resistance, and ease of resharpening. This steel is a good choice for every kind of knife from hunting and everyday carry, to kitchen cutlery. This high value steel will live through years of service and edge maintenance.

### Rc 57-58

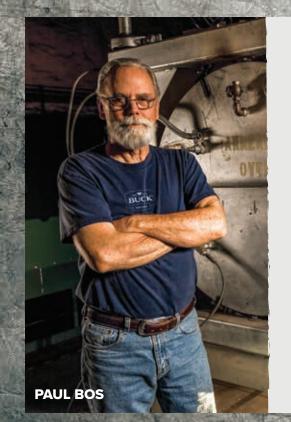

This high carbon spring steel is a good choice for applications that require impact loads and extreme bending. At a Rc 57-58, the steel is not brittle. It will bend and flex back to its original shape while still remaining hard enough for good edge retention.

Rc 57-58

# **CERAKOTE** COATINGS - BUCK'S ON-SITE CERAKOTE® LAB

Buck utilizes Cerakote® coatings to further protect blades and components, while providing many color options. Cerakote® is a Polymer-Ceramic Composite coating with a unique formulation that enhances abrasion, corrosion and chemical resistance while improving impact strength and hardness.

Coated products are marked in this catalog with the Cerakote® logo.

# **HEAT TREAT**

Heat treat could best be called "temperature treating" since Buck uses a system of hot and cold to get the most from the steel. This system was pioneered by Paul Bos, whose heat treating formulas have proven to be the best in the business. Each blade is tempered to the appropriate Rockwell hardness through a heating, freezing and reheating system that defines the properties desired from the steel.

"Paul Bos dedicated over five decades to dialing in and perfecting our heat treat process. The proper heat treat is critical to ensure the best balance between hardness for edge retention, ductility and strength for rugged use, and optimization for corrosion resistance. We still rely on Paul's expertise today and religiously follow the time-tested formulas he pioneered."

-CJ Buck, CEO and Chairman, Buck Knives

# **SHARPENING**

Edging and sharpening is all about dedication to technique and holding to specific angles. Each category has its own standards and Buck is the best at hitting those marks. Our blades are hand sharpened by skilled operators who have completed a rigorous training program.

# The History of THE 112 RANGER

*Celebrating 50 years (1972 - 2022)* 

Brass bolsters, deep clip point blade, wood handles... the unmistakable style so many generations have come to know and love in our 110 Folding Hunter and slightly smaller 112 Ranger. And to most, the 112 Ranger seems an obvious fit, a slightly smaller, more compact knife for those that felt the 110 Folding Hunter was just a bit too hefty.

But the story of 112 Ranger and its introduction into the Buck Knives stable was not a simple observation that customers may like a smaller 110. Instead it came about under necessity and as a response to unfortunate circumstances. Introduced in 1972, eight years after the 110 Folding Hunter had secured a permanent hold in the marketplace, the 112 was introduced and subsequently named after the USS aircraft carrier that would lead to its creation.

The story tells of an altercation between two sailors on the USS Ranger which became very serious. One of the sailors was inflicted with a deep stab wound, supposedly from a Buck 110. Due to the severity of the wound, the USS Ranger commander banned all knives with a blade exceeding 3" from use on the ship. This also disqualified the 110 from being sold in the ship's store.

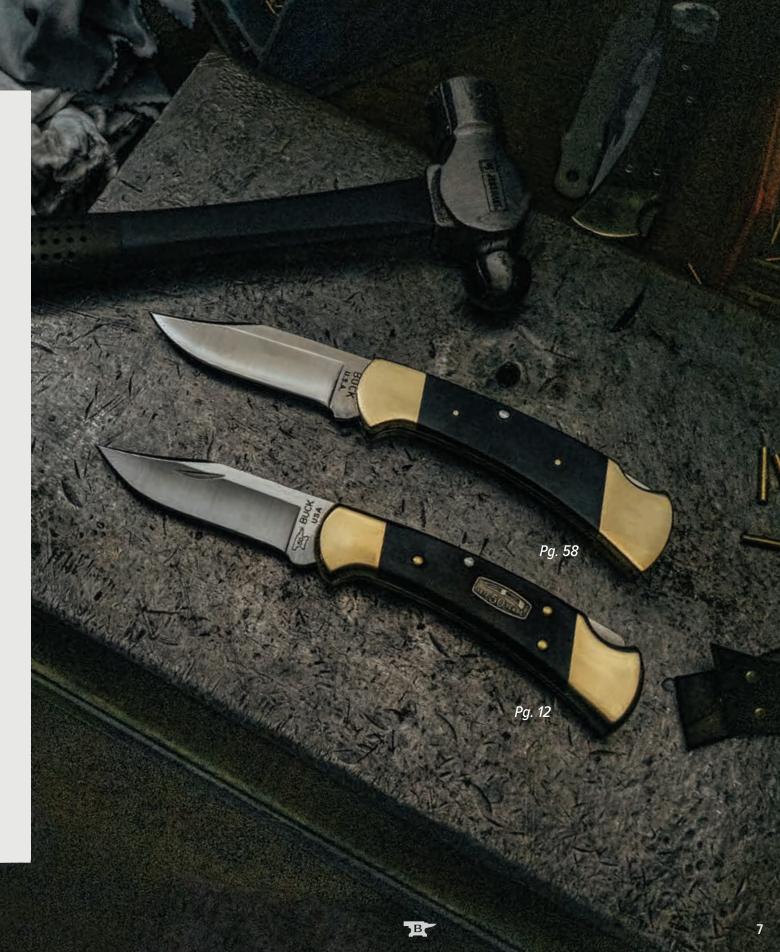

After news of these events found its way to Buck Knives, the management team was concerned this decree would become a rule across all Navy ships and naval base stores, which would put a significant dent in 110 sales at the time.

The Buck team got to work on a little brother to the 110, which we now know became the 112 Ranger, named after that ship that altered the course of

Buck's history. The first Ranger released featured a 3" 440C blade, a black Micarta® handle and the famous brass bolsters. It was in 1973 that Buck started using Macassar ebony handle inlays, then fast forward to 1992 when 420HC was utilized for the blades. This 420HC/Macassar version of the 112 held true until 2019 when Buck made the decision to use genuine Crelicam™ ebony handles sourced from Taylor Guitars.

The early Rangers, as with the 110, were not originally offered with a finger grooved models, but these grooves were being widely added in the aftermarket. Buck decided it would be best to give customers an option covered by their warranty and added the finger grooved models in 1982. Another historical tidbit – the original Ranger's did not have the nail notch in the blade. The nail notch was added around 1980 when someone on the sales team was insistent this would help overall performance of the 112. True or not, the 112 holds a high position in Buck's product line, up there with the 110 and 119 Special as a customer favorite for nearly half a century.

2022 marks the 50<sup>th</sup> anniversary of this iconic product where two commemorative versions were created. Only available in 2022, the 50<sup>th</sup> Anniversary Edition features a 50<sup>th</sup> blade stamp and custom handle medallion. A Legacy, limited edition tribute model is also available, limited to 1,000 units. This 112 is modeled after the original 1972 version with a 440C blade, Micarta® handle and squared brass bolsters. A classic product revered by many, Buck Knives looks forward to honoring the 112 by celebrating this milestone.

# THE 112 FAMILY

# Celebrating 50 years, the 112 Ranger is a famous and highly revered Buck classic.

Introduced in 1972, the 112 Ranger has a classic and unmistakable style that so many generations have come to know and love. Developed after the unprecedented success of the 110 Folding Hunter, the 112 features brass bolsters, a deep clip point blade and a rich genuine ebony wood handle. Commemorating 50 years, the standard 112 Ranger features a custom blade stamp to signify the anniversary. In addition, a commemorative model is available featuring the 50th blade stamp and a custom handle medallion. Collected and desired by many, these 112's will only be available in 2022.

# ALL NEW HUNTER & RANGER SPORT

Classic meets cool with 110 and 112 new Sport versions in modern and lighter materials.

It is no doubt the 110 Folding Hunter and 112 Ranger are two of the most famous knives in the world. With the popularity of these two knives, customers have been asking for a lighter, one-hand open version with a pocket clip. New for 2022, we introduce the Hunter and Ranger Sport, which boast S30V blades, Cerakote® coated pocket clips and Micarta® handle scales on an anodized aluminum frame. Assembled via screws instead of the standard riveted construction, your customers will be excited to have the knife they've been asking for.

**BOX:** MODEL # 0112GRS5-B, CATALOG # 13295

# **PARADIGM**

Buck's Shift Mechanism<sup>™</sup> famous bolster lock serves the Paradigm in both an assisted opening and automatic model.

Offering four PRO level knives in either assisted opening or automatic versions, the Paradigm boasts high-end S35VN steel and G10 handles. Easily opened with the slide of the bolster, the Paradigm and Paradigm Shift are an innovative option to the growing EDC trends toward high-tech gear.

Black or brown textured G10 with Cerakote® coated rotating bolster

Reversible, deep pocket carry, Cerakote® Graphite Black coated stainless steel

# **SHIFT MECHANISM**

Our patented Shift Mechanism serves as an advanced locking and safety mechanism. It not only locks the blade open when extended, but also prevents accidental opening when the blade is closed. Now utilized on an automatic model, a slight glide of the bolster will instantly open the 591 Paradigm Shift. For the 590 assisted opening model, a slide of the bolster and a quick flick of the finger works with our patented ASAP opening technology to quickly engage the blade.

### **TO OPEN**

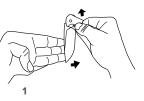

- 1. Place your thumb on the ridged portion of the bolster and push up (counter-clockwise).
- 2. **591 Automatic Version** The blade will instantly deploy. Then close the bolster to lock the blade open.
- 2.1 590 ASAP Version Move your thumb off the bolster, then use your index finger to pull the blade flipper down to start opening the blade. When the ASAP technology has completed opening the blade, be sure the bolster is closed and the blade is locked.

# **TO CLOSE**

- 1. Place your thumb on the ridged portion of the rotating bolster and push up (counter-clockwise). With your other hand rotate the blade fully closed.
- 2. Toggle the bolster down (clockwise) to lock the blade closed.

31

# ONSET

# Encompassing all the finer things an EDC knife has to offer, the Onset is built for the everyday.

The Onset is a knife full of surprising features. It's a frame lock, uses ball bearings for smooth opening, has a tough G10 handle, and boasts Buck's highest-end steel in S45VN, Bos heat treated like none other. A full flat grind on the blade tops off the rugged look. Solidly built for life, the Onset will not disappoint.

# **SLIMS**

# Modified versions of the famous 110 and 112 models, the Slims are thin, lightweight EDC counterparts to these iconic knives.

As a modern alternative to the famous 110 and 112 models, the brass bolsters and ebony handles were replaced with lightweight options to decrease weight and thickness. A reversible, deep carry pocket clip was added for convenient carry. New for 2022, the Slim Pros have been reconfigured with Torx construction and a new and improved pocket clip. Offered in 420HC and S30V steel, the blades feature dual thumbstuds for easy one-hand opening.

# LEGACY COLLECTION

# For over a century, Buck Knives has been handcrafting custom knives from unique and natural materials.

Hours of hand-craftsmanship go into each Legacy Collection knife. From modern, high-end designs to timeless pieces, this collection features unique versions of classic and newer models. Each Legacy knife is specific to the year it's created and marked with a date code stamp. With the exception of the 112 Ranger Vintage Tribute, we will not limit our annual quantity to a specific amount of knives, but will instead limit these heirloom pieces to the calendar year of production.

112 has maintained a high position in the lineup. For the 50th Anniversary, the original 1972 model inspired this 112 Ranger replica as part of the 2022 Legacy Collection. Using the original materials, this 112 features a satin finish 440C steel blade and black Micarta® handle with squared brass bolsters. Only 1,000 models of this handcrafted 112 Ranger Vintage Tribute will be available in 2022.

Certain utility and design patents issued to Buck Knives are noted, however, Buck Knives holds additional patents pending, design and utility patents both domestic and foreign on products in this catalog. All trademarks indicated are owned and/or registered by Buck Knives, Inc. except as follows: Dynaflex and Versaflex are a registered trademarks of Polyone Corp.; Micarta is a registered trademark of Industrial Laminates/Norplex, Inc.; Mossy Oak, Mossy Oak Break-Up COUNTRY and Mossy Oak Blaze are registered trademarks of Haas Outdoors, Ind.; FlipStik and JewelStik are registered trademarks of Hewlett Manufacturing; Cerakote is a registered trademark of NIC Industries, Inc. an Oregon corporation; DymaLux is a registered trademark of Cousineau Wood Products of Maine, LLC.

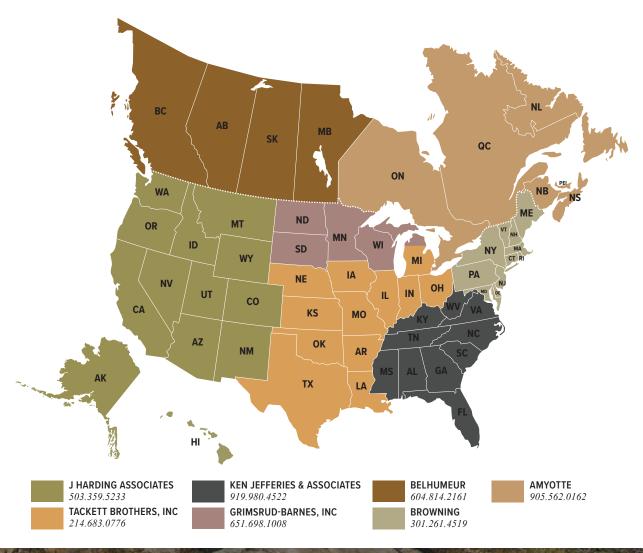

Knife laws and regulations can vary significantly from location to location. As such, certain styles, sizes and blades may not be permitted in certain locations and areas. Buck Knives produces many different types of knives for a wide variety of legitimate everyday use. However, due to the complex and ever changing nature of knife laws and regulations, it is not possible for Buck Knives to be aware of specific prohibitions in areas where its knives may be purchased, carried or used. It is the responsibility of the buyer/user to investigate, understand and comply with any and all laws and regulations that may apply to his or her area. The buyer/user is solely responsible for any claims arising from violations of these laws or regulations or any unintended use or misuse of the product

The sale of automatic knives is federally regulated. Always check permissibility within your state or locality as non-federal personnel may be precluded from ownership or use by state laws. NO EXCEPTIONS WILL BE MADE. Purchase of automatic knives must be preceded by the submission of an Automatic Knife Acknowledgement Form. Shipping of Automatic Knives: Automatic knives shipped by Buck Knives, Inc will be sent via common courier and CANNOT be shipped by the U.S. Postal Service. All returns of automatic knives must be shipped via common courier as well, and not by the U.S. Postal Service. Our policy requires that all automatic knives require a signed Automatic Knife Acknowledgement Form.

# **SALES TERRITORIES**

To help you take full advantage of all the new opportunities Buck Knives offers you for 2022, we have a team of experienced sales reps ready to work with you to develop retail solutions tailored to fit your needs. Collectively, they bring you more than 100 years of experience. To find your contact, here's a map showing our head sales reps and their territories. As always, if you have any questions about products or other topics, please contact your local sales representative or call our dealer hotline at (800) 735-2825.

Please direct consumer inquiries to (800) 326-2825 or (208) 262-0500.
