

837 SELKIRK FIRESTARTER

USING THE FIRESTARTER

1. Locate the symbol on the fire steel.
2. Scrape the ferrocerium striker against the firesteel to create a spark

USING THE LINE TENSIONER

1. With the included 550 cord, tie a loop through the first hole and pull through (see image)
2. Using the other end of the paracord, loop through both holes located on firesteel (see image)
3. Create a loop that will be attached around tent stake
4. To tighten tensioner, hold one end of the paracord and move the tensioner up to desired tautness
